Summary of the grant:	<p>The institutional grant will support the implementation of NGO Aktiv's 2025–2028 Strategy, which aims to strengthen civic participation, accountability, and dialogue between communities and institutions in Kosovo. The strategy is built around four programmes: Advocacy and Policy Influence, Dialogue and Confidence Building, Citizen Engagement and Empowerment and Organizational Development and Institutional Resilience.</p> <p>The overall goal is to ensure that citizens, especially members of non-majority communities, youth, and women, have a stronger voice in decision-making, while improving institutional accountability and maintaining open dialogue across ethnic and political divides. The proposal also focuses on strengthening Aktiv's governance, leadership, digitalization, and environmental sustainability to reinforce long-term resilience.</p>

	<p>The grant will help sustain key activities that faced reduced external funding, ensuring continuity of dialogue, civic participation, and advocacy initiatives central to Aktiv’s mission. Expected outcomes include stronger civic participation, greater institutional responsiveness to citizen needs, sustained cross-community communication and a more efficient, gender-sensitive and environmentally responsible organization. Through inclusive advocacy, dialogue, and civic education, Aktiv will continue serving as a trusted bridge between citizens, institutions and the international community.</p> <p>Citizen engagement will remain central to Aktiv’s approach. Citizens will help identify local priorities, co-design initiatives, and contribute to policy recommendations. Digital tools and public discussions will ensure two-way communication with decision-makers.</p>
