|---|---|
| Project/Program Title | "Save the environment, save the future" |
| Implementing subject (and partner if applicable) | NGO "PIKA" |
| NGOs/Unregistered Initiatives/Individuals contacts: | Name/Surname: Galdim Vagangjiu Phone Number: Mobile Phone: +38349 490 470 E-mail: pika.ojq@gmail.com |
| Implementation period | Start date: 01/03/2023 End date: 31/10/2023 8 months in total |
| Budget supported by the program | EURC Grants for Volunteerism |
| Total project budget | 4,480.00 EUR |
| Geographical coverage | Prizren region |
| Summary of the intervention | The project aims to preserve the environment, specifically the cleaning of waste thrown in nature. Its objectives are to conserve natural resources and the existing natural environment and, where possible, to repair damage and adverse trends. Due to the pressures of overconsumption, population growth and technology, the biophysical environment is constantly being degraded. This has already been recognized by various governments which have started imposing restrictions on activities that cause environmental degradation |

|---|---|
| <p>Implementation Area and Target Group</p> | <p>In this project, we have targeted citizens of different age groups, people with disabilities, citizens of different communities, where it is worth mentioning that we, as "Pika" ojq, are also supporters of all minority and majority communities. In the implementation of the project, everyone will participate without distinction, where in the above-mentioned places, with the help of everyone, we will collect garbage and clean the environment, while for people with disabilities we will provide special sticks that will help them collect the garbage from the cart. So the diversity of cultures will help in the exchange of ideas where everyone in the activities will become one for a cleaner and healthier world. We will ask for help from schools that have "Green Clubs" where they can share their experiences with us and can be voluntary participants in our activities.</p> |
| <p>Main project activities</p> | <p>The main activities of the project are: Groups of 20-25 people will be formed, where for each mentioned high month, a territory from the Prizren region will be determined, where the highest focus will be on the areas used for picnics, which have been evaluated as the most polluted, and the activity will to be carried out on the weekend where I can also have access to the citizens where we will distribute informational leaflets about soil damage. In terms of the program, we first envisage the cleaning of the environment, the collection of waste and their transfer to public waste, the supply of saplings and the planting of saplings in order to compensate for the trees that are being cut down illegally, the placement of informative signs with inscriptions that we foresee to have an effect regarding the awareness of the population and the preservation of the environment.</p> |
