| Target groups: | <ul style="list-style-type: none"> • Youth • Ethnic groups & minorities |
| Geographical scope: | Municipality of Strpce and Ferizaj |
| Summary of the grant: | <p>The project "Empowering Youth for Environmental Advocacy - YOUTH-Eco" aims to empower young people in the municipality of Štrpce/Shtërpçë by addressing two key challenges: youth disengagement and environmental degradation. Through educational workshops, public awareness campaigns, and hands-on clean-up actions, the project will strengthen the capacity of at least 20 young people (aged 14-20) to become active advocates for environmental protection and sustainability in their communities.</p> <p>The project will also foster stronger collaboration between youth and local institutions, encouraging more institutional support for youth-led environmental initiatives. Activities will include a field needs assessment, 15 workshops, awareness campaigns using both printed materials and social media, and community clean-up actions, including a large event on World Environment Day. The 8-month project will be implemented in Štrpce/Shtërpçë with a total budget of 9,970 €, contributing to a greener and more inclusive community.</p> |
